Universal Mast Mount

VALCOM'S UNIVERSAL MAST MOUNT IS AN ADAPTER IDEALLY SUITED TO MOUNT ANY VEHICULAR STYLE ANTENNA THAT UTILIZES THE 4 HOLE NATO PATTERN TO A VIXAM-40 TELESCOPING MAST.

THE DESIGN CONSISTS OF TWO PLATES SEPARATED BY TWO STRUCTURAL SUPPORT ARMS, A VIXAM-40 SPIGOT, SAFETY TETHER HOLES, AND A 4-HOLE NATO PATTERN ON THE TOP AND BOTTOM PLATE. THIS ALLOWS THE UNIT TO BE STACKABLE.

WHILE THE DESIGN LENDS ITSELF TO BE IDEAL FOR DIPOLE STYLE ANTENNAS, OPTIONAL GROUND WHIPS CAN BE ATTACHED FOR USE WITH GROUND - DEPENDENT ANTENNAS AS WELL.
